Saving water

Saving water is important because if you don't save water nothing would be able to live, for example people animals and plants would not be able to live. There are lots of ways to save water.

One way to save water is to use a pitcher and fill it up with water and keep it in your refrigearator so it stays cold and you don't have to run water from the sink and wast it when it is getting cold.

Another way to save water is to put a boul under your vegtables ☆ and catch the water so you can use it to water your plants.
☆ wal there are being washed.

Another way to save water is to put a barrel outside to catch

the rain water and use it to water your vegtables. Also anothere way to save water is to take short showers because if you do it save's water. Also you can save water by taking short showers and no bath's because bath's wast a lot of water. It's also fun to play in the sprinkiler in summer but only do it when the lawn is being watered

There are lots of ways to save water. If you don't save water then there won't be any water in the future so save water.
